PROFILE SUMMARY

Fresh graduate with strong hands-on command of ASP.NET Core MVC, built through end-to-end development of a real-world web application — from frontend UI to backend logic, database integration, authentication, and live deployment. Comfortable across the modern web stack (Angular, HTML/CSS, Bootstrap, jQuery) and proficient in MS Office (Full Suite). Looking for an entry-level opportunity to contribute as a .NET Developer.

CORE STRENGTH

- ASP.NET Core MVC — hands-on mastery through real project development (authentication, database, deployment, email integration)

TECHNICAL SKILLS

ASP.NET Core MVC • C# • Entity Framework Core • SQL Server

Angular • HTML5 • CSS3 • Bootstrap • jQuery

Git & GitHub • REST APIs • MailKit (SMTP) • PHP • Laravel

MS Office (Full Suite)

PROJECT EXPERIENCE

Star Securities (Star Project)

Security Services Company Web Application — ASP.NET Core MVC

- Built the complete frontend UI and backend architecture of a security services company platform, including admin registration, contact/hiring forms, and appointment booking.
- Implemented session-based authentication using a custom SessionAuthFilter to secure all routes except public Home/Login pages.
- Integrated automated email confirmations for contact and hiring form submissions using MailKit with Gmail SMTP.
- Connected and managed a remote MSSQL database, resolving live data persistence and configuration issues.
- Deployed the full application to a live hosting environment (somee.com), handling FTP deployment and remote DB connectivity.

Restaurant Reservation Landing Page

Custom UI/UX Restaurant Website — HTML, CSS, Bootstrap, jQuery, JavaScript

- Designed and built a unique, visually engaging restaurant landing page with a custom UI/UX experience, including a custom-styled animated mouse pointer for a distinctive browsing feel.
- Developed a table reservation system integrated directly with WhatsApp — on reservation submission, a pre-filled message with the booking details is automatically sent to the restaurant manager's WhatsApp number.
- Used HTML5, CSS3, Bootstrap, jQuery, and JavaScript to build a fully responsive, interactive single-page experience.

ADDITIONAL SKILLS EXPOSURE

- Frontend: Angular (basics), HTML, CSS, Bootstrap, jQuery
- Backend: ASP.NET Core MVC (Mastered), C#, Entity Framework Core, PHP, Laravel
- Database: Microsoft SQL Server (local & remote/MSSQL hosting)
- Productivity Tools: MS Office (Full Suite)
- Dev Tools: Git, GitHub, Visual Studio, FTP Deployment

STRENGTHS

- Fast learner — able to independently research, debug, and resolve complex real-world issues (auth, DB, email/SMTP integration).
- Full-cycle project builder: design → development → deployment.
- Strong problem-solving mindset with attention to detail.

EDUCATION

Aptech Learning Center — Garden Campus *(In Progress)*

Intermediate (Pre-Engineering) *(Completed)*

LANGUAGES

English — Professional • Urdu — Native
